

ExplorerAI

Your AI compass for navigating the unknown

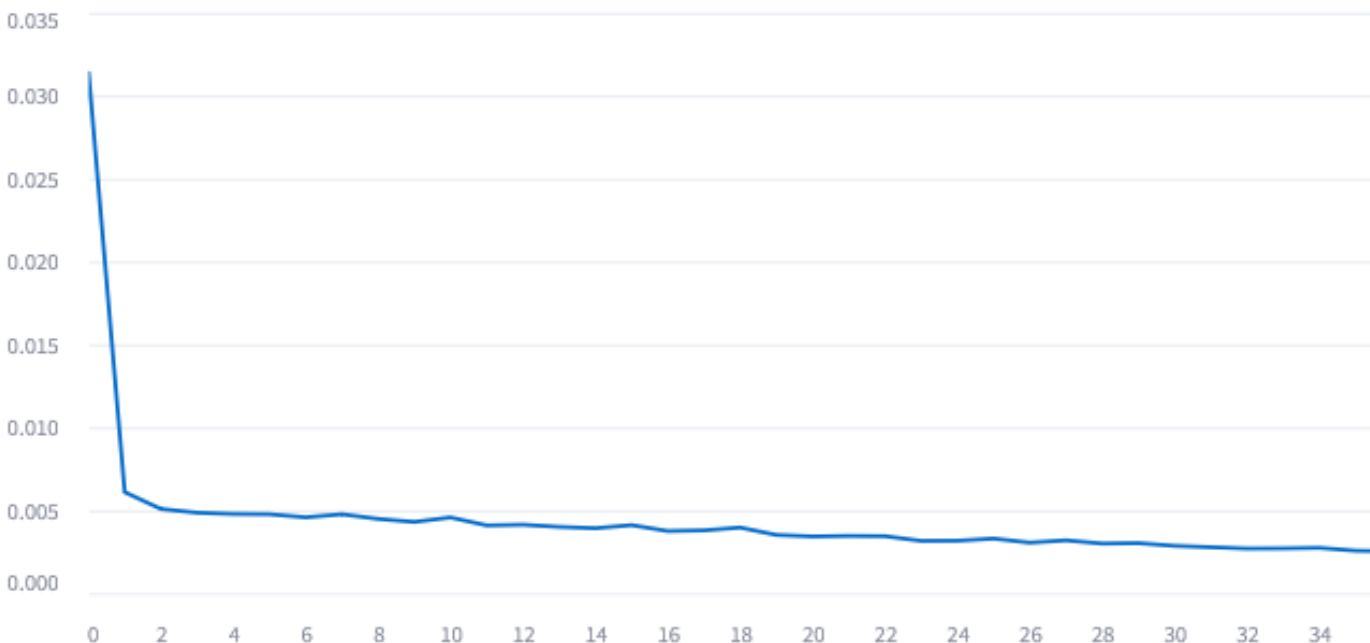

Training Metrics

[← Back to Menu](#)

Model Training & Optimization

Information about model architecture, hyperparameters, and training results.

Training Loss Over Epochs

Model Sizes Overview

 400 KB

Model size before compression [KB]

 60 KB

Model size after compression [KB]

Carbon & Energy Usage Summary

CO₂ Emissions

0.0026 kg

Energy Consumed

0.0174 kWh

Duration

474.0 s

Power Consumption by Component

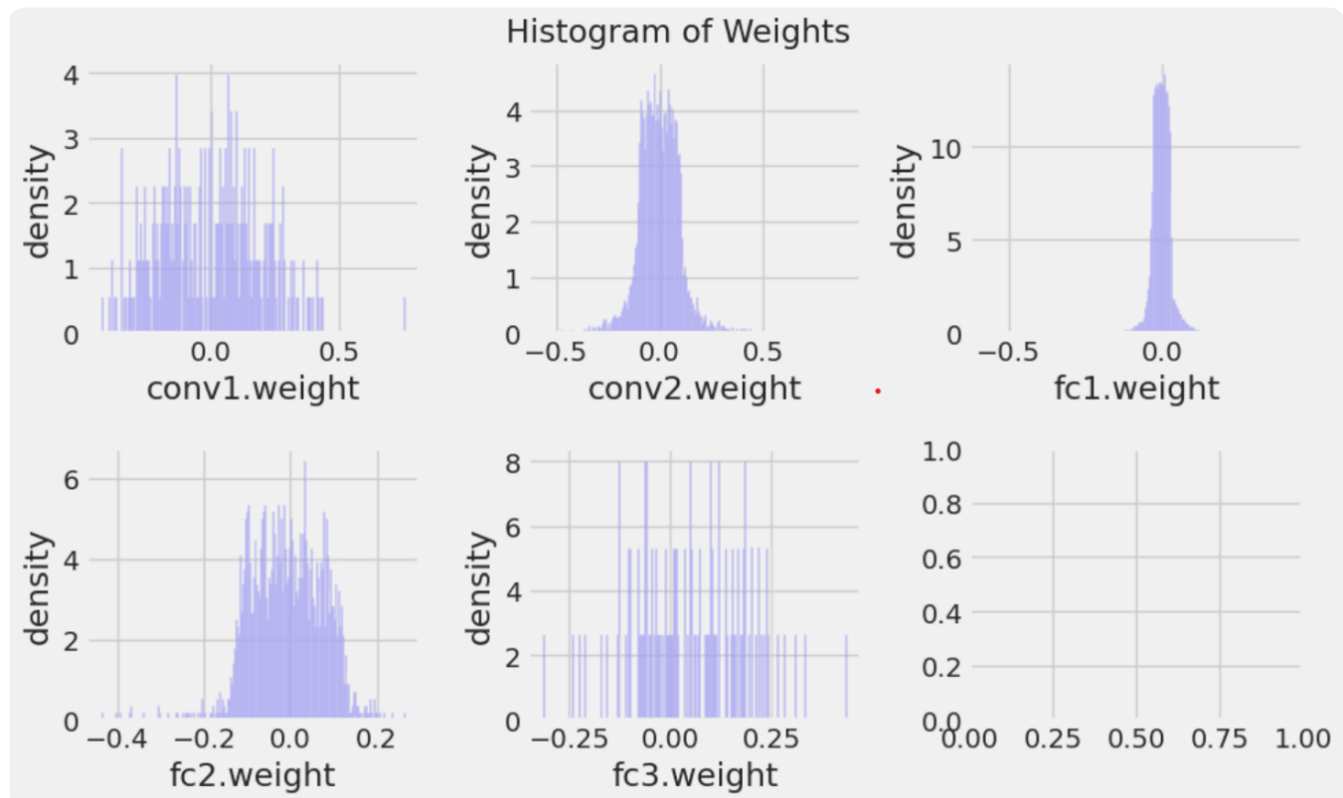

Energy Breakdown by Component

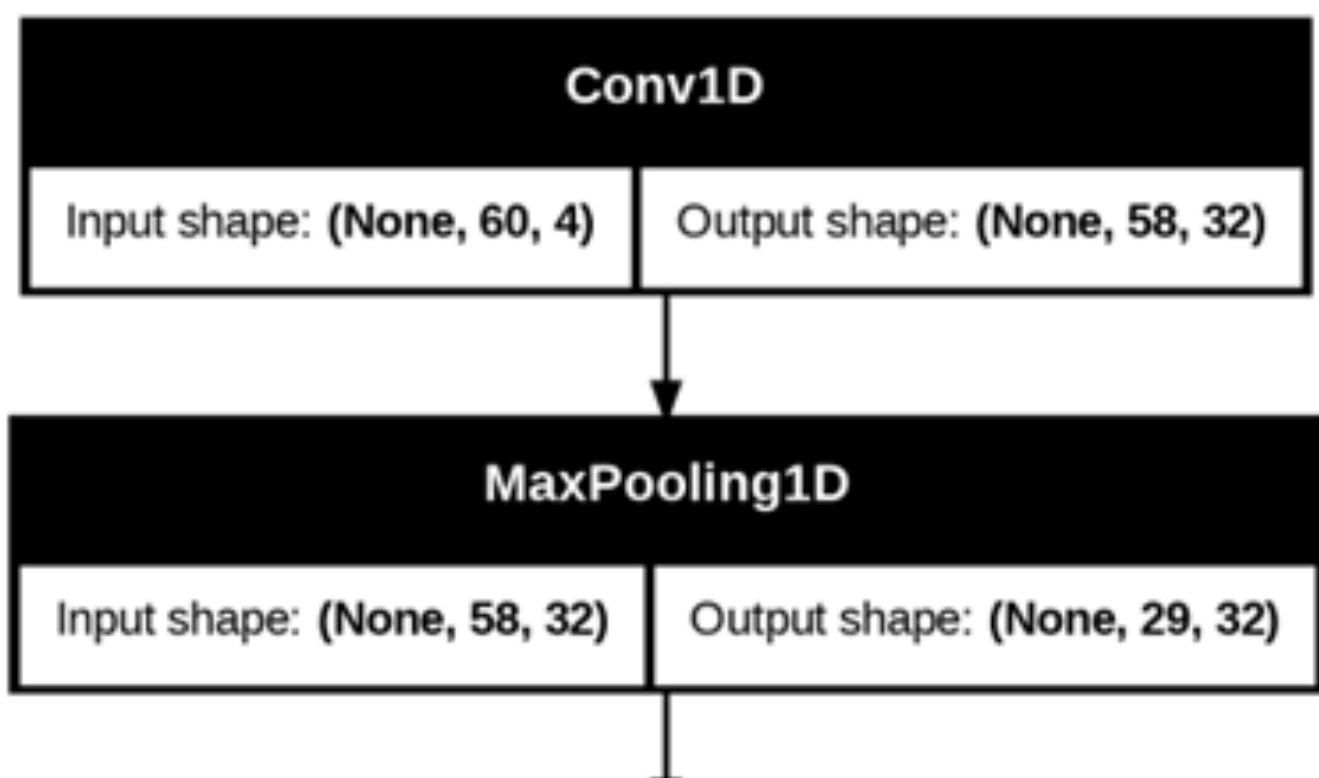

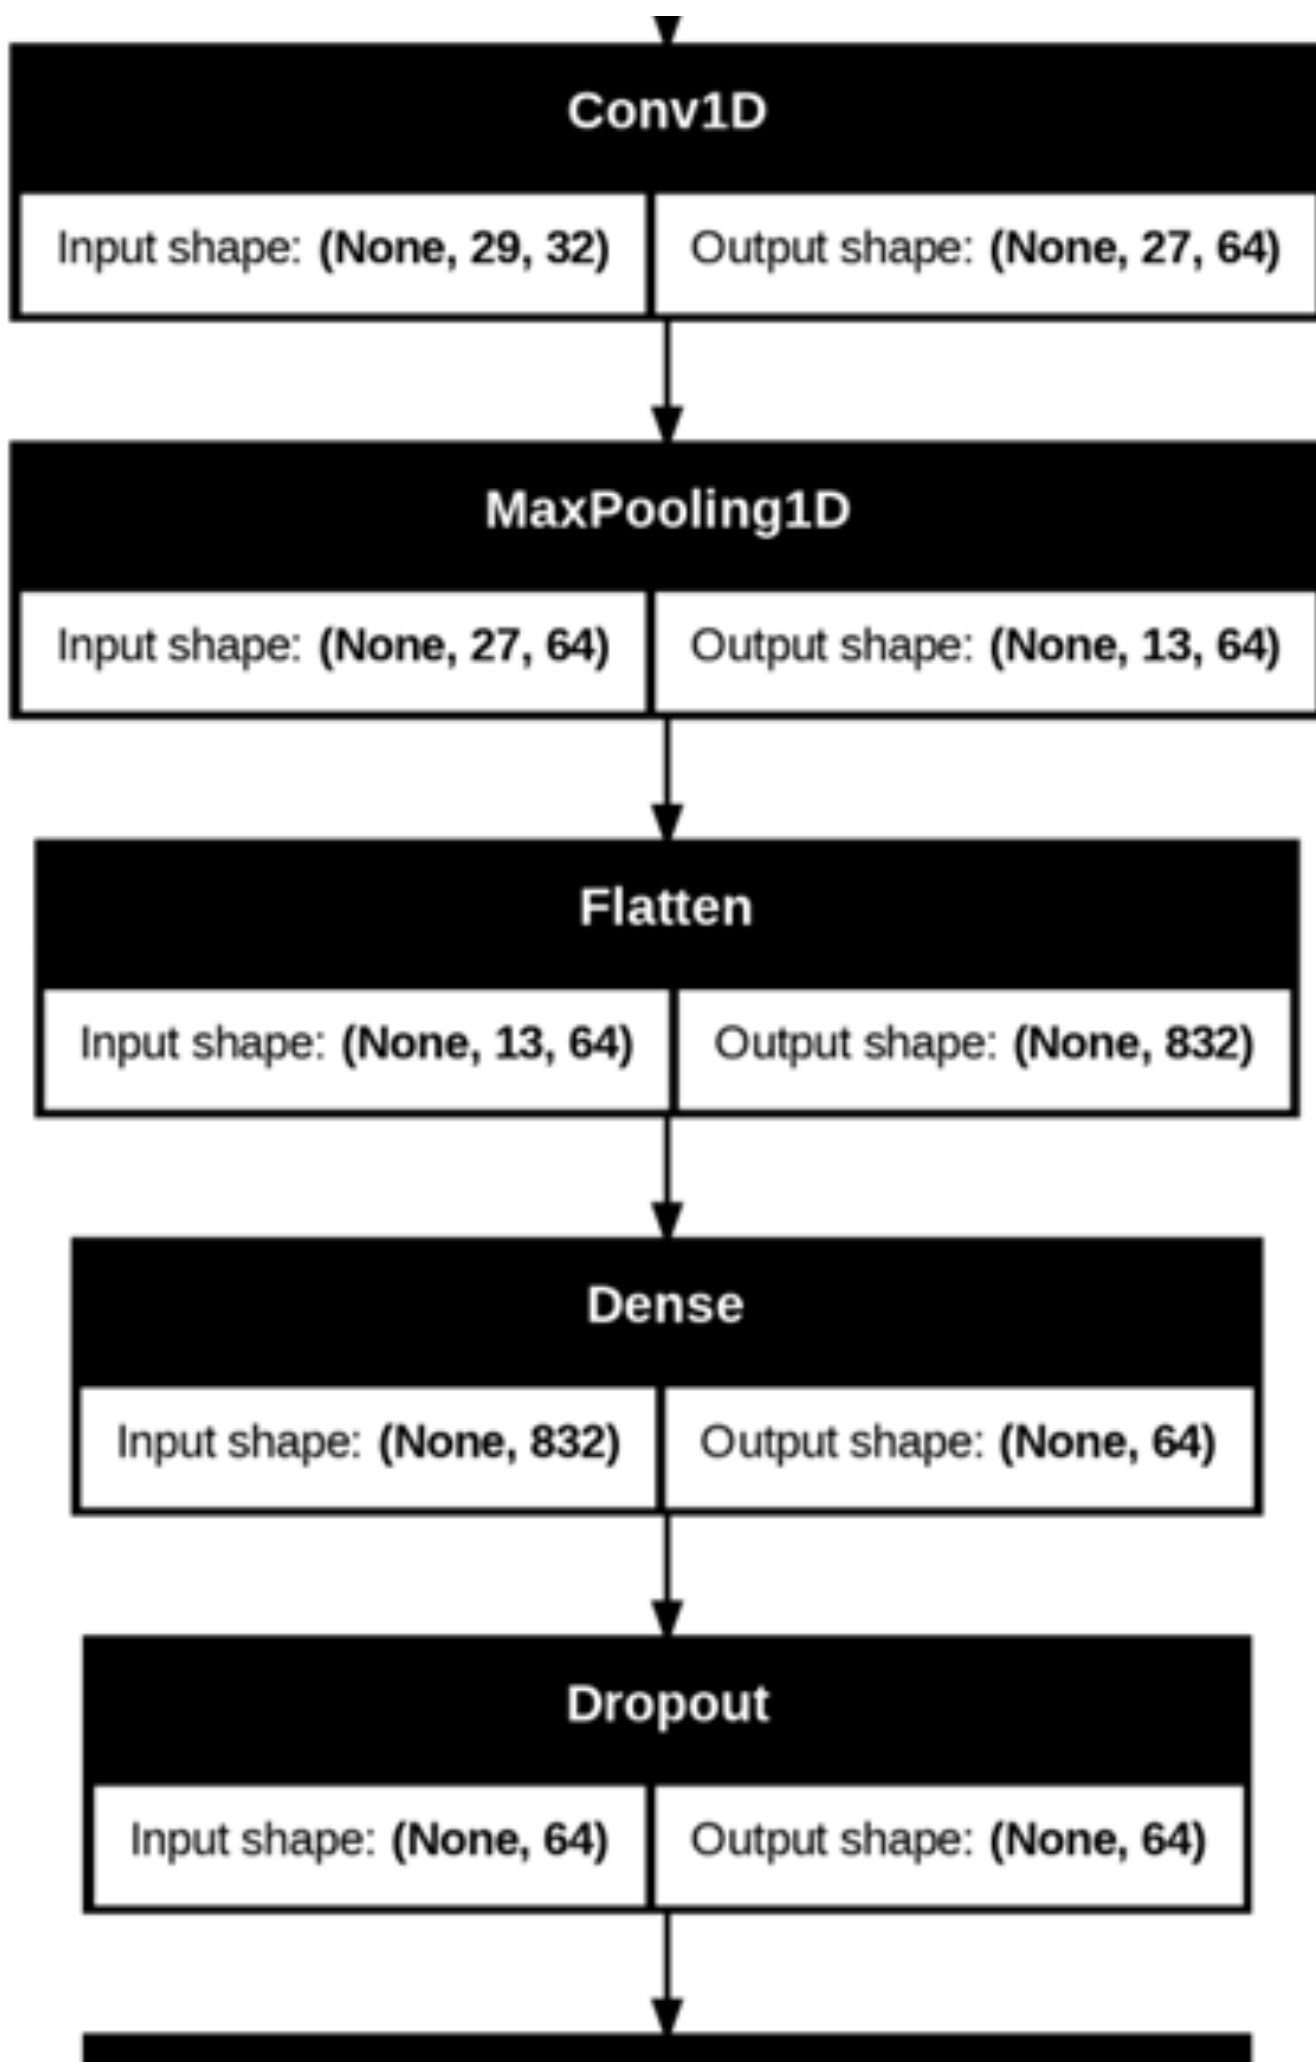

Gesture-Controlled App

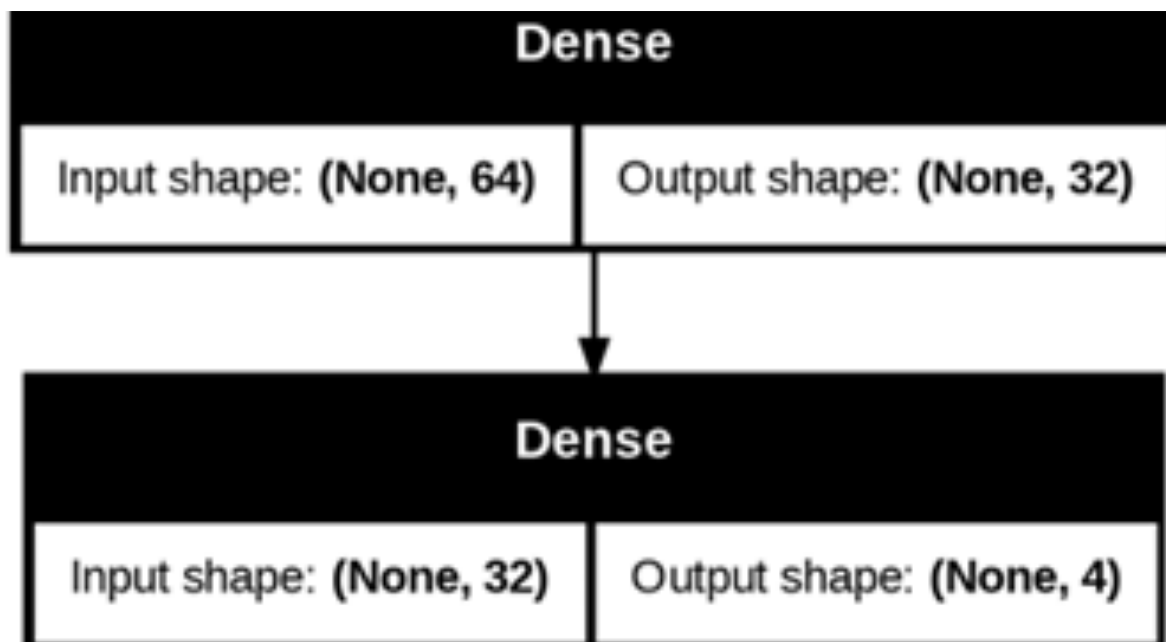

Use your Arduino Nano 33 BLE Sense to navigate using gestures — or try the buttons below to test manually.

Model Architecture

Key Learnings

We tried first with a LSTM model, but it could not be compressed
